...

GitLab

**GitHub**

## Development setup

1.  Set up your local development environment
2.  Pick a good first issue
3.  Create a branch and make your changes.

Remember to sign off your commits using `git commit -sm "Your commit message"`

4.  Create a [pull request](#) and `@mention` the people from the issue to review
5.  Fix things that come up during review
6.  Wait for it to get merged!

**Martin Stadler**

@xMartin

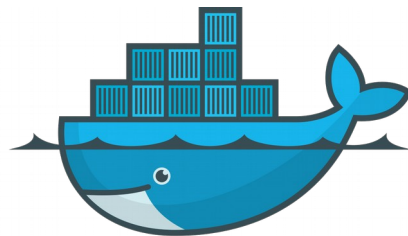

Nextcloud dev quickstart on mac:

```
git clone git@github.com:nextcloud/server.git
```

```
cd server
```

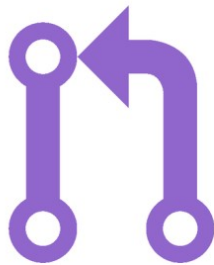

```
git submodule update --init
```

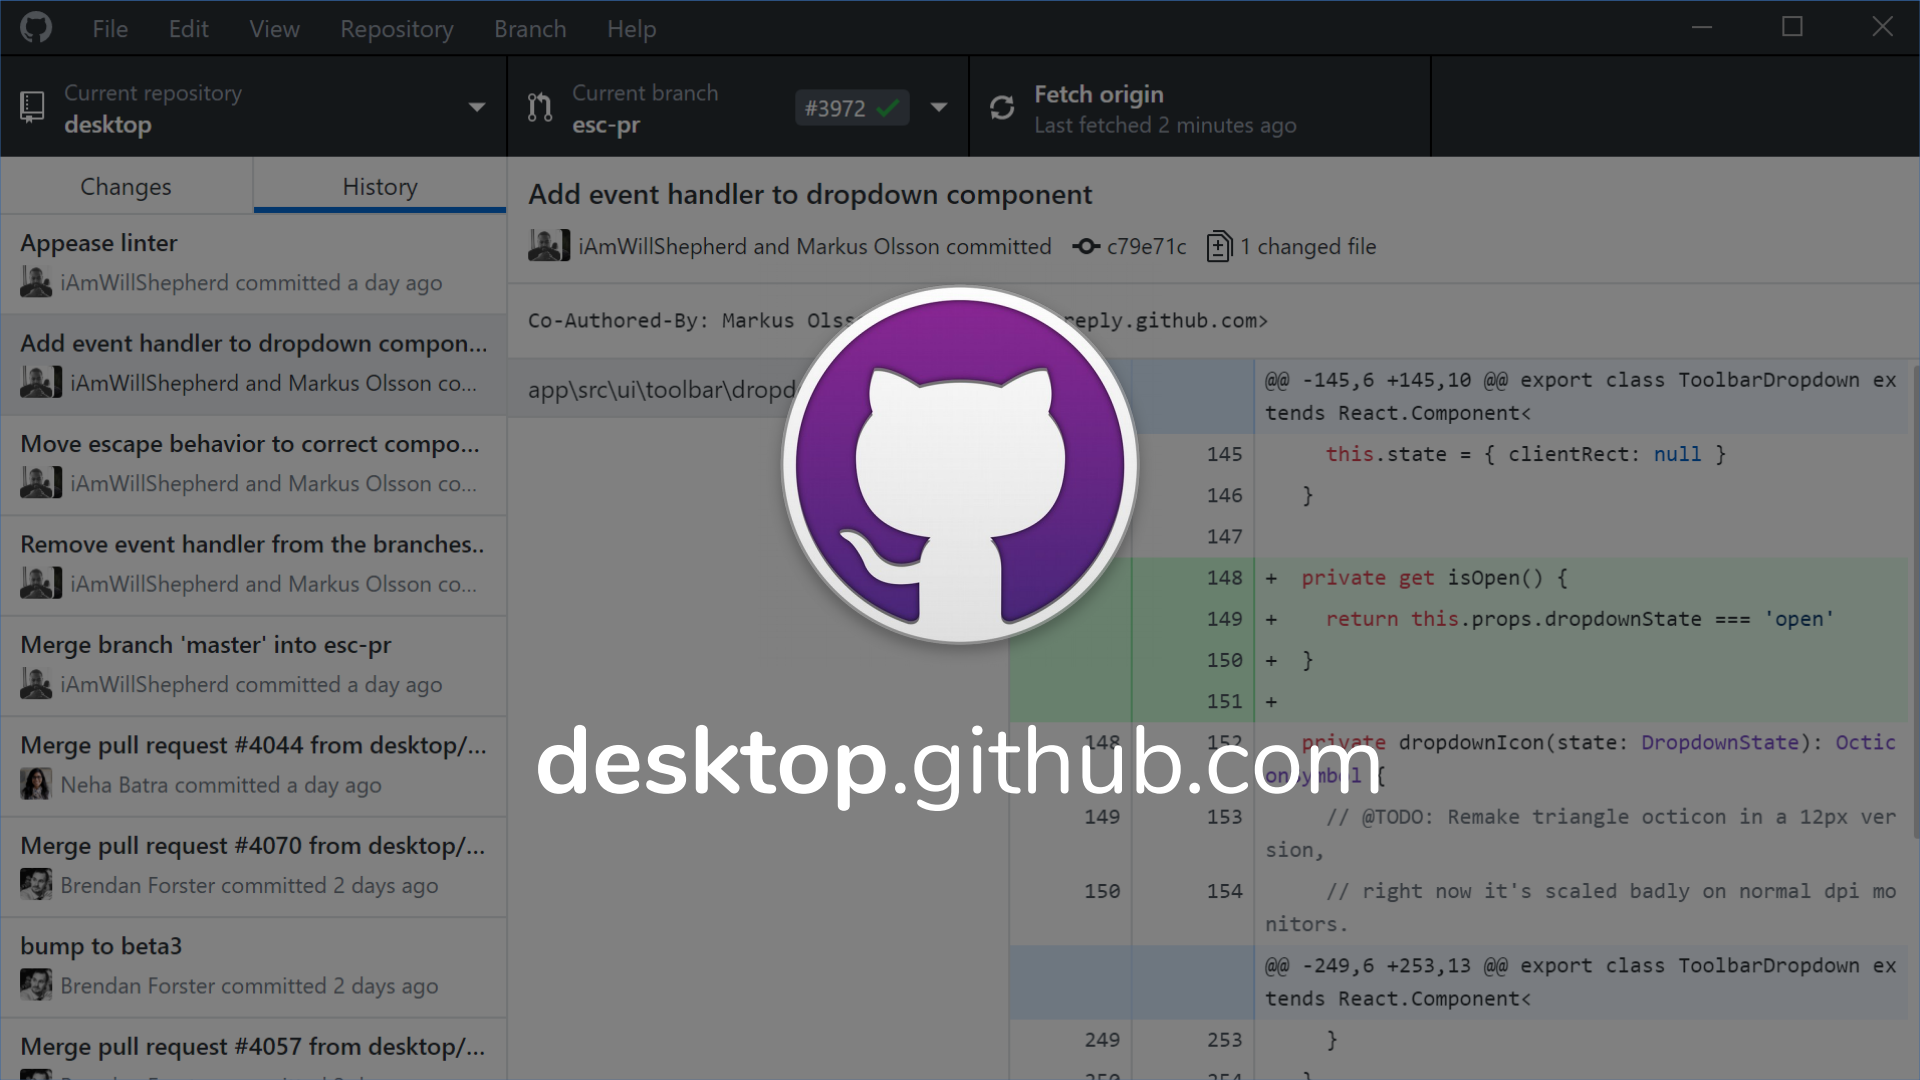

```
php -S localhost:8080
```

# docker

good first issue

## Git-it Repository

### Challenges

- Get Git
- Repository
- Commit To It
- GitHubbin
- Remote Control
- Forks And Clones
- Branches Aren't Just For Birds
- It's A Small World
- Pull Never Out Of Date
- Requesting You Pull Please
- Merge Tada

github.com/

### Goal

Create a new repository on your computer

### Repositories

A repository is a collection of files and directories with their history.

Isobelle: welcome!

Great photo Dave! Did you have a nice time?

Yeah, amazing!

HEART OF CODE

# For the Love of Code

*LIBERTÉ - DIGITALITÉ - SÆURITÉ*

# Open Source Diversity

For more diversity & inclusion in free & open source software communities 😊

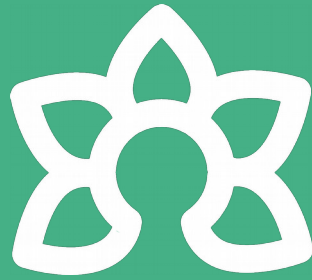

---

## Basics

---

First steps to help make your open source project more friendly and inclusive

Thank you  
& have fun!
